Forecast for Wednesday 04 Sep 2024

Weather: A few early morning light showers possible with patchy cloud. Mainly dry to start the day with sunny intervals through the morning. Cloud will bubble up later in the morning bringing scattered showers by late morning, some of these may be slow-moving and heavy with a low risk of thunder, perhaps lasting well into the evening.

Chance of cloud-free hill tops above 800m: 60% becoming 90%

Low Cloud and visibility: Cloud bases down to 700m in early morning showers, then lifting to above summits by day. Visibility perhaps moderate near any showers, otherwise generally good or very good with clear views of distant hills.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A generally pleasant day in the mountains, though packable waterproofs recommended in the afternoon for any of the heavier showers. The ground will likely be damp most of the day.

Forecast for Thursday 05 Sep 2024

Weather: A windy and cloudy day with outbreaks of rain or showers possible initially. Low cloud moving in through the day, covering the majority of slopes. Visibility will be poor through much of the day. Spells of rain will be replaced by drizzle later, becoming largely persistent.

Maximum wind: Northeasterly 15mph gusting 30mph.

Chance of cloud-free hill tops above 800m: 40%, becoming 20% into the afternoon.

Low Cloud and visibility: Cloud lowering to 300-500m for much of the day, perhaps rising to 600m late morning before returning to 200-300m. Visibility poor or very poor in cloud, hill fog and rain or drizzle.

Temperature: **Valleys:** Plus 8 Celsius becoming 16 Celsius.
At 800m: Plus 5 Celsius becoming 11 Celsius.
Freezing level: Above summits.
